GAINS Screener Items

There are 2 items on the Dane County Youth Assessment in 2009 that are part of a brief screener called GAINS (Global Appraisal of Individual Needs) Short Screener. These two items cover the topic of *internalized psychiatric disorders** which could suggest a need for referral to a behavioral treatment system. Of course individual students are not identified in the survey so these items are more of a measure of the number and nature of the students in your school.

Survey Items:

When was the last time you felt fearful, scared or panicked like something was going to happen to you?

When was the last time you were reminded of the past, and became very distressed and upset?

[*There are three other topics covered in the full screener – Externalizing disorders, Substance Disorders and Crime/Violence Disorders. For more information go to http://www.chestnut.org/LI/gain/GAIN_SS)

County Data

The tables below show the combined response for both items. Students in the second column on the right “Both screeners in the last month” are youth who say they have had these feelings most recently. The next column to the left is students who said “the last 30 days” to one item and “the last year” to the other. Moving left, the next column is the students who said “never” to one item and “in the last 12 months” to the other. The final column is students who said “never” to both.

These columns –moving from right to left – are the range of students with potential issues to students with no issues.

		Male	Female
# of students responding to both, last 30 days	1341	507 (38%)	834 (62%)
# of students responding to one, last 30 days and one last 12 months	3586	1695 (47%)	1890 (53%)
